A highly motivated Software Developer, skilled in creating and **implementing dynamic software solutions**, performing **testing and quality assurance**, and using **both backend/frontend technologies**. Enthusiastic about utilizing technology to solve business problems and staying updated with the latest trends and tools.

SKILLS

- **Programming Languages:** C#, Java, JavaScript, Python, Kotlin, HTML, CSS, XML
- **Web Development:** React.js, Node.js, Express.js, Bootstrap, jQuery, Spring Boot, WordPress
- **Databases & Backend:** MySQL, Oracle SQL, MongoDB, Firebase, Apache Kafka, API Integration, RESTful Services
- **Testing & QA:** Selenium, Manual Testing, JUnit, Jenkins
- **Architecture & Documentation:** MVC, OOP, UML Diagrams, Technical Documentation
- **Development Tools:** Visual Studio Code, IntelliJ, Android Studio, Eclipse, Git, GitHub, Postman, AWS, CI/CD
- **Project & Collaboration Tools:** Jira, Trello, Microsoft Office Suite, Google Workspace
- **UI/UX & Accessibility:** Figma, UI/UX Design, Web Accessibility
- **Professional Skills:** Teamwork, Communication, Problem Solving, Adaptability, Leadership, Time Management

EDUCATION

Software Engineering Technology (Co-op) Advanced Diploma | Centennial College, Toronto, ON Sept. 2022 - Dec. 2025

- **GPA: 4.2/4.5 (A):** C# Programming | Java | Advanced Databases (SQL) | Data Structures & Algorithms | Software Systems Design | Web App Development | Testing and QA | Mobile Application Development | Cloud Computing

RELEVANT EXPERIENCE

Software Engineer (Summer Role) | 321DataPro Inc, Toronto, ON (Remote) July 2025 - Sept. 2025

- Conducted meetings with clients to understand requirements, prepared documentation, and created use case diagrams
- Led development team on a CRM project using Flask, React, and SQLite, managing facilities, programs, and events
- Collaborated with team to design and create WordPress pages for the Pickleball site based on design requirements

Web Developer (Summer Role) | GLOCAL Foundation of Canada, Ottawa, ON (Remote) Apr. 2025 - June 2025

- Collaborated with team to develop the Canadian Housing Data website using React.js, Chart.js, and Tailwind CSS
- Integrated CMHC and Statistics Canada APIs to build dashboards on rent prices, vacancy rates, and affordability metrics
- Contributed to AI chatbot using Google Gemini and created technical documentation for future development

SEO and Website Optimization Developer (Part-Time) | Kanel Spices, Montreal, QC (Remote) Aug. 2024 - Feb. 2025

- Collaborated with cross-functional teams to design and develop responsive Shopify web applications. Integrated Rebuy Smart Cart and improved overall site functionality resulting in a 20% sales increase
- Utilized Shopify Liquid to customize themes and create interactive user experiences that enhance site performance
- Implemented SEO best practices and optimize UI/UX design to improve website performance and user engagement

Software Engineering Research Assistant (Co-op) | Healthcare Systems R&A Inc, Toronto, ON Sept. 2024 - Dec. 2024

- Developed machine learning models and front-end app, processing and cleaning data for application functionality
- Collaborated with other software engineering Research Assistants to finalize features and improve the user interface
- Generated heatmaps to visualize data and improve model accuracy, transferring from 2D to 3D models
- Created machine learning algorithms to improve single-channel 25-landmark model, adding z-dimension & visibility

Web Developer (Co-op) | Mind by Design, Toronto, ON May 2024 - Aug. 2024

- Collaborated to design and develop a responsive web application, ensuring adherence to brand guidelines and implementing interactive user experiences
- Optimized website performance through code refactoring, asset optimization, and caching techniques
- Automated workflow processes utilizing Google Apps Suite and Microsoft Office Suite
- Assisted with descriptions, newsletter content, social media posts, and promotional materials by designing graphics, animations, and manipulating digital photographs

PROFESSIONAL DEVELOPMENT

Python for Data Science, AI & Development | IBM- Online Dec. 2025

- Built foundational skills in Python for data handling, analysis, and basic machine learning workflows Introduction

Introduction to Generative AI | Google - Online Feb. 2025

- Learned core concepts of generative AI, including model types, real-world applications, and ethical considerations

Visio 2019 Essential Training | LinkedIn Learning - Online Sept. 2022

- Developed skills in creating diagrams, flowcharts, and process visuals using Microsoft Visio tools

SELECT PROJECTS

MediPredict - Diabetes Risk Prediction Web Application

- Collaborated with a team to design and develop a web application that predicts diabetes risk using real-world health data
- Processed and prepared the Pima Indians Diabetes Dataset to support model training and real-time prediction workflows
- Assisted in integrating the user interface and backend logic to enable user input and display prediction results
- Technologies/Libraries used: Python | Streamlit | Flask | TensorFlow (Keras)

Faaams Market - eCommerce Web Application

- Collaborated with an agile development team using Jira boards to track issues and tasks
- Implemented full stack e-commerce web application using React, Node.js, Express, MongoDB and Bootstrap
- Developed JWT authentication system and access control for secure user account management
- Created REST API endpoints with full CRUD operations enabling interaction with MongoDB database
- Technologies/Libraries used: React | Node.js | Express | MongoDB | Bootstrap

Hotel Staff Management – Web Application

- Designed and developed a web application to manage staff across multiple hotels, enabling creation, viewing, and updating of staff information
- Implemented features to organize staff by performance and hotel requirements, improving operational efficiency
- Technologies/Libraries used: Java | Spring Boot | MySQL | Maven | Microservices

Tutor Finder - Web Application

- Developed full stack web app connecting students and tutors with secure registration, profiles, and session scheduling
- Built role-based authentication and authorization system for admin, tutor, and client functionalities using RESTful APIs
- Created detailed technical report covering SDLC phases including requirements gathering
- Technologies/Libraries used: React | Node.js | Express.js | MongoDB | Bootstrap

ACHIEVEMENTS

Innovation & Optimization Award - Kanel Spices, Montreal, QC

- Enhanced website performance by integrating Rebuy Smart Cart, optimizing SEO, and improving UI/UX for better user engagement; recognized by the company for innovation, optimization and work ethic within the project
