

SAMAH CHAHINE

Frontend / Full-Stack Web Developer

Frontend / Full-Stack Developer with 2+ years of experience delivering production web apps in cross-functional, Agile teams. Strong React + TypeScript experience building responsive, UX-focused interfaces, integrating REST APIs, and optimizing performance. Built portfolio and contract projects using Next.js, React, and modern validation/testing practices. Comfortable collaborating with product, design, QA, and stakeholder to ship high-quality features quickly. Experience with Python/Django and databases including PostgreSQL and MongoDB.

TECHNICAL SKILLS:

- **Languages:** TypeScript, JavaScript (ES6+1), Python, SQL
- **Frontend:** React, Next.js, ReactNative, Redux, HTML5, CSS3/SCSS, Tailwind, Bootstrap, shadcn/ui, responsive design, cross-browser compatibility
- **Backend:** Node.js, Express, NestJS, Django, Flask, REST API design and integration, JWT authentication
- **DB:** PostgreSQL, MongoDB, MySQL, Redis
- **Testing & Quality:** Jest, unit testing, debugging, browser DevTools, performance optimization
- **Tools & platforms:** Git, GitHub, Linux (Ubuntu), VsCode, npm/Yarn
- **Design & Collaboration:** Figma, UI/UX collaboration, accessibility (WCAG basics), documentation

CERTIFICATIONS

- Certified Associate in Python Programming (PCAP), Python Institute 2021
- Certified Entry-level Python Programmer (PCEP), Python Institute 2020

COMMUNICATION & COLLABORATION SKILLS:

- Thrive in agile, cross-functional teams, bridging technical and client needs.
- Translate designs into responsive web interfaces and maintain clear documentation.
- Adapt quickly to shifting priorities and dynamic project scopes.
- Analytical, solutions-focused communicator; fluent in English and additional languages.
- Strong at managing tasks and meeting tight deadlines.

RELEVANT WORK EXPERIENCE

Freelance Full Stack Web Developer, WITT (Women Innovating Technology Together) Remote Mar 2024–Present

Worked in a cross-functional WITT team (developers, UX/UI designers, QA, and a project manager) to build KidsFirst, an MVP co-parenting web app focused on scheduling, communication, and shared responsibilities.

- Built and shipped responsive **React + TypeScript** UI features from **Figma** handoffs, ensuring pixel-accurate, accessible components and consistent **UX**.
- Collaborated in an **Agile** workflow (daily standups, feature branches, code reviews), resolving merge conflicts and maintaining clean **Git** history.
- Improved maintainability through component refactoring, modularization, and documentation of architecture decisions and implementation details.
- Performed debugging and **unit testing** to validate functionality, using browser **DevTools** and test tooling to identify regressions and performance bottlenecks.
- Iterated quickly based on **UX** reviews and user feedback, improving usability and clarity across key flows.

Full Stack Developer (Contract) , Global Compliance Client (NDA)	Oct 2024–Dec 2024
Tech Stack: React, TypeScript, Vite, NestJS, MongoDB, Stripe API, JWT, Bcrypt, Formik, Zod, Jest, Node.js, Express, Tailwind Email/OTP Verification, Logging/Throttling	
- Developed a secure, multi-step registration and subscription flow using React + TypeScript, delivering a fast, intuitive UX with strong validation and step navigation. - Implemented NestJS guards/interceptors for auth, request logging, and rate-limiting/throttling; validated inputs with Zod to reduce invalid requests. - Integrated Stripe for one-time and recurring payments with robust handling of error states and user messaging. - Refactored and optimized front-end logic to improve performance, reducing lag and improving reliability under real-world usage. - Coordinated with cybersecurity, UX/UI, QA, and stakeholders to deliver a high-quality release under tight deadlines.	

PROJECTS

NoteBuddy , AI Notes & Study Assistant (Portfolio)	
Tech Stack: Next.js, React, TypeScript, Prisma, PostgreSQL, Supabase Auth, Zod • Live: [NoteBuddy]	
- Built a modern web app using Next.js and React with TypeScript, focusing on responsive UX and maintainable, reusable UI components. - Implemented authentication and user session flows using Supabase Auth, including protected routes and secure access to user content. - Designed database models with Prisma and persisted application data in PostgreSQL, supporting reliable CRUD workflows and clear error handling. - Enforced type-safe, user-friendly validation using Zod for inputs and request payloads, reducing invalid submissions and improving overall reliability. - Deployed the application on Vercel, managing environment variables and production builds for reliable releases.	

IT Teacher , Emirates National School, Abu Dhabi, UAE	2007-2012
IT Teacher , ABC Private International School, Abu Dhabi, UAE	2004-2007
- Taught middle and high school students across a diverse, multicultural environment; adapted communication style to different skill levels and learning needs. - Designed and delivered teacher workshops and training sessions, improving staff confidence with technology and classroom integration. - Built strong rapport with students and colleagues through active listening, clarity, and consistent follow-through; supported a positive, inclusive learning culture.	

Programmer with VB.net, Abu Dhabi National Bank, Abu Dhabi, UAE	2004
- Successfully acquired proficiency in VB.NET programming language independently when I secured my first job as a programmer at the bank, adhering to rigorous security procedures - Contributed to all SDLC phases, ensuring the delivery of high-quality banking solutions. - Fostered teamwork across departments for efficient project execution in a fast-paced environment. - Solved complex technical challenges, reducing application downtime, and improving user satisfaction.	

EDUCATION

- Diploma in Full Stack Web App Development (Honors) — Canadian Business College, Canada 2022-2023
- Bachelors in Computer Science (Honors) — Ajman University of Science and Technology, UAE 2000-2004

KEY ACCOMPLISHMENTS

- Improved SaaS registration form performance (Lighthouse) by refactoring state management and reducing unnecessary re-renders. - Improved front-end performance by optimizing images (compression + resizing + WebP where applicable), reducing bandwidth usage and speeding up page loads.
