Toronto, ON | +1 604-782-4524 | mani.rastegari@gmail.com | www.github.com/manirastegari | www.linkedin.com/in/mani-rastegari

Summary

Versatile web and mobile developer with expertise in both frontend and backend technologies, specializing in designing, building, and deploying responsive applications using React.js, React Native, JavaScript, Node.js, Express.js, Python, Kotlin, and Swift. Proficient in utilizing GCP, AWS, and modern tools such as FastAPI and MobX to enhance scalability and performance. Committed to effective teamwork, with strong communication skills for project coordination. Passionate about continuous learning and staying ahead with emerging technologies, I am eager to apply my technical expertise and creative problem-solving to contribute to project success.

Technical Skills

- **Frontend:** HTML5, XML, CSS3, Bootstrap 4, Flexbox, Grid, JavaScript ES6, DOM manipulation, jQuery, React.js, MobX, Git, GitHub, Web Design
- **Backend:** C#, C++, PHP, Node.js, NPM, Express.js, FastAPI, EJS, REST APIs, Databases, SQL, SSMS, MongoDB, Mongoose, OAuth, Authentication, Firebase, Google Cloud Platform (GCP, AWS), Microservices, Deployment (GitHub Pages, Render, Heroku, MongoDB Atlas), Web3 Development, Blockchain Technology, Bash Command Line
- **Mobile Development:** Android (Kotlin, Java), iOS (Swift), Cross-Platform App Development (React Native)
- **Electronics Engineering:** MATLAB, C++, Python, Proteus

Experiences

SimplifyAd Inc– Full Stack Developer

(Feb. 2023 – Present)

- Developed and deployed a comprehensive online platform for free advertising, supporting small businesses and service providers.
- Designed and developed cross-platform mobile applications for iOS and Android using React Native and MobX for efficient state management, enhancing user engagement and accessibility.
- Implemented a high-performance backend with FastAPI, microservices architecture, and integrated third-party APIs for enhanced functionality.
- Utilized Docker to streamline deployment and ensure consistent environments across development and production.
- Managed Google Cloud Storage and MongoDB databases for data storage and retrieval, optimizing scalability and enabling efficient data querying with GraphQL.
- Led the project from conception to deployment, ensuring timely delivery and quality assurance.

SAVVII Group Inc– Mobile and Web App Developer

(Feb. 2022 – Feb. 2023)

- Designed and built mobile applications using React Native for both iOS and Android platforms.
- Developed a secure and scalable backend using Node.js and Express.js, implementing RESTful APIs for core application features.
- Integrated MongoDB for data persistence and optimized database queries for performance and scalability.
Implemented authentication and authorization using JWT and OAuth-based flows.
- Ensured high performance and security through code optimization and input validation.
- Maintained a user-friendly internal website that met the company requirements for efficiency and functionality.
- Contributed to CI/CD pipeline setup for automated deployment and testing.

Mani Rastegari

Toronto, ON | +1 604-782-4524 | mani.rastegari@gmail.com | www.github.com/manirastegari | www.linkedin.com/in/mani-rastegari

Divar – Backend and Web Developer

(Jan. 2021 – Feb. 2022)

- Designed and developed backend services using .NET and C# for enterprise-level applications.
- Created REST APIs to facilitate seamless communication between frontend applications and databases.
- Developed logging and monitoring tools to track API performance and system health.
- Worked on SQL Server database optimization, including indexing and query tuning.
- Assisted with Linux-based server deployments and maintenance.

Sarina Language GP – Junior Software Engineer

(Nov. 2019 – Dec 2020)

- Developed an English learning website using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Created a video library where users could access and view educational videos.
- Implemented multiple-choice questions and online quizzes to reinforce learning after each video.
- Built the main website to introduce the company, facilitate user login, and handle payments.
- Ensured seamless integration of all features to provide a comprehensive learning experience.

Education

George Brown College – Mobile Application Development and Strategy – Postgraduate 2025

- Android Development with Kotlin and Java, iOS Development with Swift, Web Development with JavaScript and Cross-Platform with React Native, MERN Stack Development. (GPA 4.0)

The Complete Udemey 2023 Web Development Bootcamp

- Full-Stack Web Development, HTML 5, CSS 3, JavaScript, jQuery, Node.js, REST, APIs, Databases, SQL, MongoDB, Firebase, React.js, React Hooks, Web Design, Web3 Development

Islamic Azad University – Master of Science in Software Engineering 2017

- Main courses: Computer Systems Design, Network Programming, Software Design, Computer-Aided Design, Systems and Machine Intelligence, Software Engineering Methodologies

Islamic Azad University – Bachelor of Electrical Engineering – Electronics 2013

- Main courses: Object-oriented programming with C++, MATLAB, Operating electrical systems, Algorithms
