CAREER PROFILE

Results-driven and detail-oriented Web Developer with a strong foundation in maritime operations and technical systems. Passionate about crafting efficient, user-focused digital solutions through clean, maintainable code and thoughtful design. Known for analytical problem-solving, adaptability, and a collaborative spirit. Brings an eagerness to learn, build, and grow while contributing to innovative, high-impact engineering projects.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, Python, HTML5, CSS3, React.js, NodeJS

Tools & Technologies: Git/GitHub, VS Code + Claude, REST APIs, Responsive Design, Debugging & Testing

Other: Agile Workflow, Documentation, Cross-Functional Collaboration, LLM integrations

PROFESSIONAL EXPERIENCE

Freelance Web Developer

August 2022 – present

Multiple Businesses, Canada

Special Optical Fibers Company, Marketing Agency, Security Systems Company, Catering Company.

- Designed and developed responsive, user-focused web applications using React.js, JavaScript, HTML5, and CSS3, ensuring consistent UI/UX across devices.
- Integrated REST APIs and implemented interactive front-end features to enhance user engagement and functionality.
- Built internal automation tools (e.g., light polarization calculator) that improved operational efficiency and reduced processing time.
- Applied Agile methodologies, maintained clear documentation, and used Git/GitHub for version control and collaboration.
- Troubleshoot and optimized application performance through debugging, testing, and cross-browser validation.
- Collaborated directly with clients to translate business goals into scalable technical solutions while maintaining clear communication throughout the development cycle..
- Demonstrated an eagerness to learn, build, and grow, continuously improving technical depth and development practices.

Marine Navigation Officer

October 2007 – August 2022

Offshore Marine Companies Worldwide

Career path from Deck Cadet to Chief Officer on a number of vessels and offshore units worldwide.

- Advanced from Deck Cadet to Chief Officer, overseeing vessel navigation, cargo operations, and maintenance of technical systems.
- Led cross-functional teams under high-pressure conditions, ensuring operational efficiency, safety, and compliance.
- Developed strong leadership, analytical, and systems-thinking skills - directly transferable to software development and problem-solving environments.
