PROFESSIONAL SUMMARY

Enthusiastic and highly motivated Full Stack Developer with a solid foundation in computer science and hands-on experience in full-stack software development. Adept at creating robust and scalable web applications, I am passionate about leveraging a variety of technologies to develop innovative solutions that optimize performance and user experience. Proficient in both front-end and back-end development, I thrive in dynamic environments and am committed to continuous learning and professional growth.

OBJECTIVE

Seeking a challenging position as a Full Stack Developer where I can contribute my technical expertise and problem-solving skills to develop and enhance software systems. I aim to work in a collaborative environment that values innovation and professional development, allowing me to further hone my skills and contribute to impactful projects

WORK EXPERIENCE

ECODEMAND

Full-stack developer | Apr 2024 - Current

- Develop and maintain features of the EcoDemand Ecommerce platform using PHP and Laravel framework for server-side logic and React.js for dynamic client-side interactions, ensuring seamless integration and a cohesive user experience throughout the application stack.
- Integrated Stripe payment gateway into the EcoDemand platform, allowing seamless and secure processing of online payments for products or services.
- Optimize code for performance, scalability, and maintainability, following best practices and coding standards

EXTRAMUS

Full-stack developer | Jun 2023 - Aug 2023

- Led the development of a dynamic beach booking management web application, utilizing a tech stack including HTML, CSS, ReactJs, JavaScript, Sass, Tailwind CSS, PHP, Laravel, Redis, and MySQL
- Spearheaded the design of the system's robust relational database schema, ensuring optimal data organization and retrieval efficiency.
- Transformed design team's UX wireframes and mockups into highly responsive and interactive features, employing HTML/CSS, vanilla JavaScript, and React.
- Engineered, optimized, and seamlessly deployed REST API Endpoints, fostering smooth communication between the frontend and backend components.

- Implemented authentication and authorization systems for both frontend and backend, fortifying the application's security measures.
- Rigorously tested API endpoints to ensure reliability, performance, and data integrity.
- Successfully updated and optimized WordPress site, enhancing overall user experience and platform functionality.
- Customized WordPress themes to align with project requirements, demonstrating adaptability and attention to detail.
- Applied Scrum methodology to project management, ensuring efficient collaboration, iterative development, and timely delivery of project milestones

EDUCATION

ONTARIO TECH UNIVERSITY, OSHAWA - CANADA

Masters in Information Technology Security | Jan 2026 – current

CONSTRUCTOR UNIVERSITY, BREMEN - GERMANY

Masters in Computer Science and Software Engineering | Sep 2022 - May 2024

SKILLS

- Full-stack development
- Agile Methodology
- Version Control
- Responsive design
- Leadership/
communication
- Creativity

TOOLS

- PHP
- Java
- Python
- JavaScript
- Typescript
- HTML5
- MySQL
- CSS3
- Laravel
- Django
- React
- VueJs

- NestJs
- NextJs
- Redux
- Cypress
- Git
- Bootstrap
- Tailwind CSS
- SCSS
- Rest APIS
- AWS
- Composer
- NPM
- WordPress

LANGUAGE SKILLS

ENGLISH – C2

PROJECTS

VIRTUAL TEACHING ASSISTANT (VTA)

Master's Thesis

By leveraging Large Language Models (LLMs) technology, this project focused on creating a context-aware virtual teaching assistant for the Capstone Project Course at Constructor University. The assistant is designed to comprehend course materials and respond to knowledge-based queries, reducing the need for repetitive human intervention.

Impact and Outcomes:

- **Designed and Developed:** Created a context-aware virtual teaching assistant leveraging BERT, a robust LLM, to support the Capstone Project Course. This assistant facilitates efficient and accurate student support, enhancing learning outcomes and user engagement.
- **Enhanced Learning Experience:** Empowered students to receive prompt and precise answers to their queries regarding course materials, thus promoting a personalized and interactive learning environment.
- **Data Extraction and Model Fine-tuning:** Extracted data from course presentations and fine-tuned a BERT question-answering model on this data. This process ensured the assistant's responses are highly relevant and accurate.
- **Seamless Interaction:** Developed a user-friendly website (using NextJs) to enable effortless interaction between students and the virtual teaching assistant, ensuring accessibility and ease of use.
- **Model Validation:** Conducted thorough validation using Exact Match (EM) and F1Score metrics. The model achieved an EM score of 0.71 and an F1Score of 0.88 across all validation datasets (799 questions), indicating a high level of accuracy and comprehensive information retrieval.

NEGOMBO

Full-stack Developer

Beach and park reservation platform (Ischia Island near Naples)

Impact and Outcomes:

- Led the development of a dynamic beach and park booking management web application.
- Introduced unique features such as bulk booking from admin panel and dynamic resolution of uncompleted booking.

GROCERYGURU

Full-stack Developer | Sept 2022 – Dec 2023

An online food discount search engine that allows users to find grocery discounts and offers based on their preferences, without having to pay any fees while also enabling them to personally contribute to the global end of hunger quickly and easily.

Impact and Outcomes:

- Developed GroceryGuru, an innovative online food discount search engine, empowering users to find personalized grocery discounts without fees.
- Introduced unique features such as preference-based discount recommendations, contributing to a more tailored user experience.

UNICREDITPAYMENT

PHP Package provides a powerful and versatile payment processing solution designed to simplify and streamline the integration of UniCredit payment gateway and methods within your Laravel applications. This package offers the tools and flexibility you need to make the payment process seamless and secure

Impact and Outcomes:

- Engineered the UniCreditPayment PHP package, streamlining payment processing within Laravel applications.
- Significantly simplified the integration of UniCredit payment gateway, reducing development time and resources.

TRAVEL

Travel is an integrated web platform for booking and managing bus tickets designed using HTML, CSS, PHP, Laravel, React, MySQL, Js, SCSS, and Bootstrap. Customers can make bookings based on their desired route, fare, facilities, and a variety of other options supplied by the system, as well as check the availability of trips remotely from a trip inventory. Additionally, it enables a transport firm to efficiently manage their entire ticketing process, lowering their overall operating costs and enhancing the services they provide.

Impact and Outcomes:

- Designed and developed Travel, an integrated web platform for seamless bus ticket booking and management, utilizing a comprehensive tech stack including HTML, CSS, PHP, Laravel, React, MySQL, Js, SCSS, and Bootstrap.
- Empowered customers to make bookings based on preferences, including route, fare, and facilities, enhancing the user experience and personalization.
- Implemented a remote trip inventory system, allowing users to check trip availability conveniently.
