

MARC JEFFERZON SAAC

Email: marcsaac123@gmail.com | **Phone:** (825) 777-0768 | **Location:** Edmonton, Alberta

SUMMARY

Self-motivated entry-level tech enthusiast with hands-on experience in **Python, SQL, C++, C#, JavaScript, HTML, CSS**, and strong skills in **Windows applications, Excel, Word**, and **Kali Linux (VM)**. Developed multiple **Discord bots**, automation tools, SQL databases, and web pages. Participated in the **OffSec Gauntlet CTF**, solving beginner challenges and practicing real-world cybersecurity fundamentals. Quick learner with strong analytical skills and an interest in **software development, IT support, and cybersecurity**. Actively pursuing **CompTIA certifications**, with long-term goals of earning **OSCP** and **CISSP**.

SKILLS

Programming: Python, C++, C#, JavaScript, HTML, CSS

Frameworks: Django, Flask

Databases: SQL (CRUD operations, tables, queries)

Cybersecurity:

- Basic vulnerability scanning
- Log analysis & event tracing
- Identifying user attack patterns from logs
- Kali Linux tools (beginner)

Tools / OS: Windows OS, Kali Linux VM, Command Line, **Basic Git knowledge (commit, push, pull, branching)**

Software: Excel, Word, PowerPoint

Other: Troubleshooting, basic networking, critical thinking

PROJECTS

Python Discord Bots (Multiple Projects)

- Developed automation, moderation, and custom command bots using Python.

- Integrated **Django** and **Flask** to create dashboards, API endpoints, logging, and bot configuration tools.

Python Automation Scripts

- Built scripts to automate file sorting, folder cleanup, and text manipulation.

SQL Mini Database

- Created simple tables and performed full CRUD operations.

C++ Console Program

- Programmed a basic calculator/menu-driven logic tool for practice.

JavaScript Interactive Page

- Designed a small DOM-interactive webpage with dynamic features.
-

CYBERSECURITY EXPERIENCE

OffSec Gauntlet CTF Participant

- Completed beginner challenges involving enumeration and basic exploitation.
 - Used **log analysis** to identify attacker behaviour and trace user actions.
 - Practiced scanning, detecting vulnerabilities, and understanding basic cyberattack flow.
 - Strengthened knowledge of foundational security concepts and CTF-style problem-solving.
-

STRENGTHS

Self-motivated • Fast learner • Problem-solving • Detail-oriented • Strong communication • Works independently or with a team • Can work under pressure • Meets tight deadlines

CERTIFICATION PATH (In Progress / Planned)

- **CompTIA (ITF+, A+, Security+)**
- **OSCP (Offensive Security Certified Professional)**
- **CISSP (Certified Information Systems Security Professional)**
