

- Operating Systems: Windows 10/11, Windows OS Administration
- Networking & Security: TCP/IP, DNS, DHCP, Network Setup, Firewalls, Connectivity Troubleshooting
- Technical Support: Troubleshooting, Customer Service, Incident Handling, User Support
- Programming and Scripting: Powershell, Python, HTML, CSS, JavaScript, SQL, R, Java
- Data Science & Analysis: NumPy, Pandas, Scikit-learn, SQLAlchemy
- Data Visualization: Tableau, Power BI, Matplotlib, Seaborn, ggplot2
- Databases: Oracle, Microsoft Access, Excel, Relational Databases
- Tools: Figma, Google Workspace, Microsoft Word, PowerPoint, Jupyter
- Development & Methodologies: SDLC, Agile, QA, Test Case Design

Experience

Urban Planet - Customer Sales Associate, Toronto, ON

June 2023 - Present

- Utilized internal **relational inventory management systems** for product lookups, stock verification, and transactions processing with **99% data accuracy**.
- Provided technical support to customers, offering solutions for product issues both in-store and via phone, enhancing user experience and demonstrating effective communication by **~35%**,
- Delivered real-time technical assistance for WI-FI, software login issue, hardware errors, transaction failures, reducing checkout delays in ICT by **~35%**
- Collaborated with management to improve and escalate workflows, reducing issue resolution time by **~30%**
- Strengthened technical communication skills by supporting staff and customers through system-related errors and device issues.

Education

- York University, Toronto, ON
Information Technology Spec. Hons, Bachelors Degree | September 2022- Present
 - *Microsoft Excel Expert - Advanced Features (Course Certified), Google Data Analytics (via coursework)*
 - *IT Systems, Microsoft Access, Tableau, Power BI*
- Albert Campbell, Toronto, ON—*High School Diploma* | September 2018 - June 2022

Certifications & Technical Labs

- IT Systems & Networking Lab - DNS, DHCP, TCP/IP, Firewall Configuration, Windows Server, Active Directory
- SQL & Database Management - Oracle, MS Access
- Data Visualization - Python, R, Tableau & Power BI Dashboards
- Web Application Development - Frontend & Backend Integration

Project Experience

IT Help Desk Ticketing System - SQL Analytics Projects

Technologies: SQLite, SQL, Data Cleaning, Query Design, VS Code

- Built a normalized relational schema + dataset for IT ticketing operations.
- Produced an analytical dataset and documentation including schema, queries, README, which demonstrates SQL fundamentals and IT support operations.
- Cleaned and imported 100+ tickets into a structured SQL database.
- Developed queries for SLA risk detection, severity/priority analysis, and system insights.
- Implemented risk scoring logic for real world IT support analytics.

Data Science Project – Autism Screening Analysis

Technologies: Python, Pandas, NumPy, Scikit-learn, SciPy, Matplotlib

- Cleaned and preprocessed **700+ patient records** using Pandas and Numpy.
- Built **Logistic Regression and Decision Tree Models** achieving **>85% classification accuracy**.
- Applied **Chi-Squared statistical testing** to evaluate feature impact and visualized insights using Matplotlib.
- Identified weak predictive correlation in demographic features, supporting improved clinical screening focus.

Usability Evaluation & UI Redesign – Bikes ‘R Us

Tools & Methods: HTML, SDLC, UX Testing, SUS Survey, Think-Aloud Protocol, Figma

- Conducted structured usability testing with **10 + tester**, capturing behaviour feedback and workflow inefficiencies.
- Analyzed results using the **System Usability Scale (SUS)** and identified **12+ Critical UI bottlenecks**.
- Delivered a redesigned Figma prototype that improved task completion success from **~60% to ~90%**.
