SUMMARY OF QUALIFICATIONS

Trilingual Full Stack Developer and Data Analyst with a strong foundation in Database Management and Engineering. Experienced in the software lifecycle, from architecting secure backend systems to optimizing frontend performance. Proven ability to adapt quickly to emerging technologies, including Generative AI tools and browser-based applications. Dedicated to collaborative Agile environments and dedicated to rigorous QA standards and documentation.

EDUCATION

Diploma of College Studies (AEC) – Programming and Data Analysis LaSalle College	2024 – 2026 Montreal, QC
Bachelor in Computer Systems Engineering (Completed – 2 years) Tecnologico Nacional de Mexico	Hidalgo, Mexico 2021-2023
Cisco Certified Support Technician (CCST) Preparation Cisco Networking Essentials – NetAcad	Montreal, Canada 2024
Networking Academy course IT Essentials Cisco IT Essentials – NetAcad	Montreal, Canada 2024

PROFESSIONAL EXPERIENCE

Junior Software Developer DevFortress	Oct 2025 – Jan 2026 Montreal, QC
AI & Backend Architecture: Architected AI Agents integrating local Python servers with Google AI platforms using the Model Context Protocol. Built the ODCAF MCP server to enable AI querying via JSON-RPC and SSE. Browser Extension Development: Engineered a privacy-first React/Vite Chrome extension. Executed a progressive retrieval algorithm to balance result recall with token efficiency via the Gemini API. Product Development (Lyria MVP): Built an advanced audio processing tool featuring track segmentation, deep editing logic, and real-time mixing using Python and modern web frameworks. Conversational Agent Architecture (Athena MVP): Designed and performed AI agents integrated as internal personas within a single chat, enabling natural language creation, editing, deletion, and activation, with conversation level. QA & Documentation: Applied automated QA workflows using Autopilot Agents.	
Freelance Web Developer Self-employed	2019 – Present Hidalgo, Mexico
Designed and deployed 15+ custom responsive websites for businesses using HTML, CSS, JavaScript, and WordPress. - Improved site performance, achieving 95%+ Google PageSpeed scores through code optimization and asset compression. - Managed server configurations, security, and ongoing maintenance, ensuring 99% uptime for the client portfolio.	
Database Administrator Jymaci Construction	2021 – 2023 Hidalgo, Mexico
- Oversaw relational databases with over 5,000 records, ensuring strict data integrity and security protocols. - Implemented indexing strategies and query optimizations that reduced execution time by 30%. - Executed disaster recovery compliance and automated backup strategies, maintaining 99.9% data availability.	

SKILLS & KNOWLEDGE

Languages & Frameworks: Python (FastAPI), JavaScript/TypeScript, React, Vite, Next.js, SQL.
AI Architecture: Model Context Protocol (MCP), Gemini API, LLM Integration, Microservices, REST/RPC.
Tools & Platforms: Git, Docker, Render Cloud, JIRA, WordPress, Power BI.
Languages: Spanish (Native), English (Fluent), French (Professional Working Proficiency - B2)
Interests: Software Development, Database Management, Web Technologies, and Data Analysis.
